Essay

Some have said “there are no facts, only interpretations.” Write an essay (maximum 500 words) that tries to explain what this controversial notion might mean. It could mean many things in many different contexts and you do not need to take up a strong agree/disagree position in your essay. What might lead a person to assert such a claim? Can you think of current or historical situations or debates that would lend weight to one side or the other? Do not do any research to find out what others have said on this topic, though you may engage authors or material you’ve already studied in your discussion if this helps you to develop your own thinking. The strongest papers will examine the claim from more than one angle, show evidence of creative thinking, and express ideas in clear, structured, and interesting ways.

Application checklist

I have submitted a complete application for admission to a degree program at the University of King’s College, including application form, fee and required supporting documents to date.

I have asked two persons to act as references for me, and understand they will be contacted.

I have submitted four hard copies of an original essay in response to the topic provided.
